

Empty but Live: Blank Page

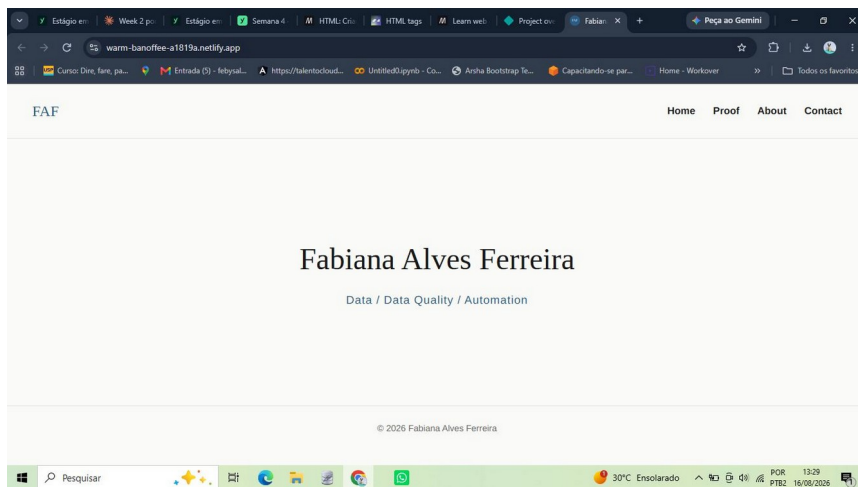

Fabiana Alves Ferreira

Live URL: <https://warm-banoffee-a1819a.netlify.app>

Stack used: Simple HTML/CSS + Netlify (drag-and-drop) — the same stack decided and justified in "Three Roads: Choose Your Strategy with AI".

1. Confirmed on two devices

Desktop (Google Chrome):

Mobile (Google Chrome):

Technical note: during testing, I noticed that opening the link directly from inside WhatsApp made the app's built-in browser force a dark theme on the site (black background, white text) — something outside the site's own code. Copying the same link and opening it in a real Chrome browser (screenshot above), the site appears exactly as designed: light background, identity kit colors and typography. This confirms the site itself is correct; the variation came from the browser, not the code.

2. AI workspace updated

Visual identity kit, case studies (Week 2), and content map (Week 3) have already been added to the AI workspace, ready for the build week ahead.
